

## Pyoderma Gangrenosum Patient Registry

### Have you been diagnosed with Pyoderma Gangrenosum (PG)?

Boehringer Ingelheim is conducting a voluntary research registry for Pyoderma Gangrenosum. PG is not well understood and there is currently no standardized therapy for its treatment. The goal of this registry is to gain a better understanding of the condition.

### Why participate in the registry?

- Your experience with PG will help experts better understand the disease and develop new therapies
- You will be helping advance the understanding of PG so that patient care can be improved

### Who can participate in the PG Patient Registry?

- You can participate if you are at least 18 years of age and have been diagnosed with PG

### What will my participation involve once I am enrolled?

- Participation in this registry will not change your treatment or medical care in any way
- Download the registry app on your mobile device and create an account to enroll
- Search for your healthcare providers and connect your provider patient portals
- No special medication or study visits will be required
- Attend appointments as usual
