Cost Field Test Reports

CMS has been developing new episode-based cost measures for potential use in MIPS with feedback from clinicians, specialty societies, and patients, families, and caregivers. As part of the measure development process, CMS provides a Field Test Report to each clinician or clinician group meeting the testing case minimum for one or more measures. The information in the Field Test Reports is for field testing purposes only, and does not affect clinicians' and clinician groups' MIPS scores.

The information in this report is for field testing only. It doesn't affect any scoring or payment adjustments in the Merit-based Incentive Payment System (MIPS). The information in this report is believed to be accurate at the time of production. The information may be subject to change at the discretion of the Centers for Medicare & Medicaid Services (CMS), including but not limited to circumstances in which an error is discovered. Only clinicians (identified by their unique Taxpayer Identification Number [TIN] and National Provider Identifier [NPI] combination, or TIN-NPI) and clinician groups (identified by their TIN) with at least 20 episodes during the measurement period have received a field test report.³

I mocked this up from the previous Field Test. New data will not be available until Jan 26, 2026.
